T. C. JONES EDITOR

ADVERTISING RATES ON APPLICATION
Chipley, Fla. Oct. 30th 1897

The Clarion of Milton, and the Times
of Milligan, are making faces at each oth
er now. Stop it boys, some one may laugh
directly. Don't do that, it is naughty.

Yellow fever has been in the South
about fifty days. It is not so fatal as was
the heat in the North last summer, or the
grippe last winter, but more fuss is made
about it.

Mrs. Josephine K. Henry will be a can
didate for the presidency in 1900. What
a pity she is a prohibitionist, else all our
gallant editors would stick by her through
thick and thin.

There had been over three thousand
cases of yellow fever in Louisiana, Mis
sissippi and Alabama, during the present
scourge, and but 288 deaths up to Satur
day, Oct. 23. This shows a very mild
death rate. If these States had a Porter
and a Florida quarantine law, see the dif
ference.

A South Carolina legislative committee
figures that the dispensary institution
owes the state school fund \$311,000, and
that the dispensary has on hand a stock
worth \$350,000. Possibly it would be good
plan for the school fund to apply for a
receiver before it is too late.

Blanco, who is going to Cuba, has full
confidence in the efficacy of the new pro
gram to "insure immediate and certain
success," yet he thinks it will take him
about seven months, more or less, to end
the rebellion. There must have been an
error in the translation. If Blanco were
to order his breakfast "immediately" he
would probably not be satisfied to get it
any time within seven months.

The New Orleans Times Democrat ex
plains that it does not advocate a National
Board of Health that has already failed,
but a national quarantine that is new.
The distinction is one of name only. It
is true that the old health board had no
quarantine duties to perform until fever
ever had broken out, but it declared the
existence of fever and then instituted
quarantines that did not stop its spread.
And when a quarantine enforced by na
tional authority could not confine the fe
ver to one town, how can it guard all our
coast.—T.-U. & C.

Some Gall.

For pure and unadulterated gall, Jack
sonville merchants heads all. Only a few
weeks ago Mr. W. G. Powell went there
to try and dispose of some space in a few
Florida weekly papers, and he was flatly
informed that they would not have the
space, if given gratis, it was no good to
them, etc. Now they come to everyone
of us with a circular concerning "Gala
Week" there, and ask all the space we
can spare, all "dead head." If we are of
no service to them, why ask this of us.
They may have gotten it in some instan
ces, but not many. If they don't need us,
we certainly don't need them.

A Big Land Deal.

A Vast Area of Florida Timber Land
Sold for \$200,000.

Valdosta, Ga. Oct. 23.—One of the larg
est land deals of the year has been con
summated here. It is the purchase by
Messrs. B. P. Jones and J. R. Saunders
of 150,000 acres of land near St. Andrews
Bay, in Washington county, Florida. The
land was bought from the Dutch syndi
cate, and it is said that about \$200,000 is
involved in the deal. The land is all
timbered and is said to be one of the
finest bodies of timbered lands in the South.
Mr. Saunders has been over in that sec
tion for some weeks and has thoroughly
inspected the lands, and upon his return
from there the deal was consummated. The
land will be developed with naval stores
enterprises.

WHAT IS MAN?

An exchange says the question is an
swered by an old maid, as follows.
"Man is a two-legged animal that chews
tobacco and walks on the forked end.
Most men are born; we never heard of
but one that wasn't; he was made of mud
for a sample. Man's life is full of disap
pointment, growls and cob pipes. He go
eth forth like a lion in the morning and
leaves the wood for his wife to chop, and
in the evening sneatheth home with his
pants ripped and his heels gone and rais
ing Cain about hard times. He has the
grip on road working days and walks
twenty miles to a circus. He will chase a
Jack rabbit four miles through the snow,
then borrow a horse to ride a half mile to
the postoffice.

TRUCK PATCHES.

We know of some farmers that almost
make their truck patches pay their house
hold expenses, leaving their corn, cotton,
etc., as a surplus. Not one of these men
are in debt. Why? Simply because they
live off the home products of the farm and
have a surplus for the market. In the
spring they sell vegetables of all kinds,
roasting ears, chickens, eggs, butter, etc.
Later on the watermelon patch gives
quite a nice little sum, and the sale of
fruit increases the amount.

We know of farmers, however, who say
they have no time to spare from their
farm for truck patches. They are too much
engrossed in large crops of cotton. They
raise no pigs and but little poultry. They
buy canned goods in the store to supply
the deficit caused by not having good
gardens and truck patches. The crop of
cotton is pledged to the merchant to pay
for these things and western meat. What
is the consequence? In debt and unable
to pay if the crop fails.

Dr. Porter the Man.

The Birmingham Age-Herald one day
last week editorially suggested that the
States of Florida, Alabama, Mississippi,
Louisiana and Texas come together and
select an executive officer who shall have
charge of the quarantine system of the
entire gulf coast. The Age-Herald sug
gests the man as follows:

"The man, it seems to us, to take charge
under the general authority of the five
state boards, is Dr. Porter, of Florida.
Look at Florida, serene and happy, al
though one end of the state is thrust al
most into Havana's foul, disease-breeding
harbor. Dr. Porter has kept Florida
securely free from the dread fever. He
could do as much for the rest of the gulf
coast. He would need to control, how
ever, as the agent of each state, not only
the quarantine stations, but also the en
tire coast district from Key West to the
Rio Grande, and when he said to a filthy
little village or a fouler town of greater
pretensions to do this or do that, his or
der must be obeyed within the time he
might name. A dictator he would be, but
one of our own choosing. We need a com
petent, energetic despot on the gulf
coast."

Government and Filibusters.

"Everything possible has been done by
this government to discharge the obliga
tions imposed upon it by the neutrality
laws."

This statement was made by Secretary
of the Navy Long, in answer to my ques
tion regarding the efforts put forth by
this government to intercept filibustering
expeditions intended for Cuba.

"The navy," he continued, "has main
tained a cordon of ships along the coast,
especially in southern waters, where fili
busters have shown the greatest activity.
The treasury department has kept a fleet
of revenue cutters on patrol duty, and
both the treasury and department of jus
tice have been in constant communica
tion with collectors, marshals and others
for the purpose of preventing if possible
violations of the neutrality laws. Our
purpose and our effort have been to dis
charge the duty which those laws impose
upon us."

As further evidence of the diligence
of the government, an estimate was made
yesterday showing that the government
has so far expended nearly \$2,000,000 to
prevent the departure of filibustering ex
peditions from this coast. Administration
officials say, in view of this expenditure,
that it seems strange that the Spanish
government should announce its in
tention to submit a huge claim of dam
ages at the close of the war on account of
the departure of expeditions from this
coast for Cuba.—A. W. B. in Atlanta
Journal.

Consumption

Out-door life and Scott's
Emulsion of Cod-liver Oil with
Hypophosphites have cured
thousands of cases of consump
tion in the early stages. They
cure old, advanced cases too;
but not so many, nor so prompt
ly. When a case is so far ad
vanced that a cure cannot be
made, even then SCOTT'S
EMULSION checks the rapid
ity of the disease, relieves the
pains in the chest, reduces the
night sweats, and makes the
cough easier. In these cases it
comforts and prolongs life.
Don't experiment with cures
that destroy the digestion. Pin
your faith to the one remedy
which has been THE STAND
DARD FOR OVER 20 YEARS.

Book about it free for the asking.
For sale by all druggists at 50c. and
\$1.00.
SCOTT & BOWNE, New York.

celebrated tobacco and read
the coupon—which gives a
list of valuable presents and
how to get them.

Spain Getting 'Sassier'

London, Oct. 25.—The Madrid corres
pondent of Daily Mail says: "The Span
ish press unanimously supports the atti
tude of the Government, which it calls
eminently sober and dignified; but the im
pression is that the controversy with the
United States has reached a critical stage
which may be the prelude to a rupture."

"I spoke with three members of the
Cabinet to-day, who in almost identical
words contended that Spain has the right
after her tremendous sacrifices in Cuba,
to demand the observance of international
neutrality by other nations. One of
them he added.

The Gordian knot is the United States,
without whose help the rebellion would
long ago have been suppressed. We do
not want war, but every European na
tion will approve of our defence of our in
ternational rights.

The November Elections.

Notwithstanding that this is an "off
year" in politics, there will be a number
of important elections in various states
November 2nd, next. In Iowa, Massa
chusetts, Ohio, and Virginia elections
will be held for governor and full state
ticket. Elections for supreme justice,
state comptroller, chief justice, clerk of
court of appeals, state treasurer and mi
nor offices will take place in Colorado,
Kentucky, Maryland, Nebraska, New
York and Pennsylvania.

Delaware, Iowa, Maryland, Massachu
setts, New Jersey, New York, Ohio, Penn
sylvania and Virginia are the states in
which Legislatures will be voted for.

Nevada and Washington will elect new
legislatures November 9. In January,
the legislature of Maryland will choose a
successor to Arthur Pue Gorman, Demo
crat, for the United States Senate.

A United States Senator will also be
chosen in Virginia to succeed Senator
Daniels.

An Old Idea.

Every day strengthens the belief of em
inent physicians that impure blood is the
cause of the majority of our diseases.
Twenty-five years ago this theory was used
as a basis for the formula of Brown's Iron
Bitters. The many remarkable cures effected
by this famous old household remedy are
sufficient to prove that the theory is correct.
Brown's Iron Bitters is sold by all dealers.

Newspapers in Schools.

The public schools of Kansas City are
among the most progressive in the coun
try. The enterprising superintendent of
public education in that city has made an
innovation by introducing newspaper
text books.

For several years past many of the
teachers of the more advanced grades of
the Washington, D. C., public schools
have encouraged their pupils to discuss
topics of the day which are touched on
by the newspapers, but Kansas City, we
believe, is the first city in this country to
adopt newspapers as regular text books.

The experiment is the subject of much
discussion and a very decided difference
of opinion as to its advisability has de
veloped in Kansas City.

We should say that nearly everything
depends upon the sort of newspapers that
are used. There are many newspapers
in the United States, some of them very
rich and very widely circulated, which
not only should never be introduced into
a school room, but which should be ex
cluded from every decent home.

It is probable that the leading local
newspapers of Kansas City will be used
in the local schools. These are clean and
well conducted journals, but it is ques
tionable if even such newspapers should
be used as school text books. Certainly
such use should be restricted to the older
and most advanced pupils.

The modern newspaper is a very lively
thing, and there is danger that the study
of newspapers would direct the attention
of the average public school pupil from
the regular lines of scholastic education.

The Kansas city experiment will be
watched with interest, and we may ex
pect from the able school superintendent
of that city a full and fair account of the
results of his innovation as soon as he is
able to form a definite opinion thereon.—
